

Welcome to ProNovos

We are excited to partner with you. The following will help you prepare for your Spectrum Viewpoint data sync and ProNovos implementation.

ACTION ITEMS FOR GETTING PRONOVOS ACCESS TO SPECTRUM CONSTRUCTION MANAGEMENT SOFTWARE

The Spectrum Viewpoint platform hosted by Trimble has 4 different product offerings.

Trimble Construction One or Viewpoint One or VRL Cloud

ViewPoint Enterprise Cloud (VEC RDP) is the most recent legacy cloud

Spectrum On-Premise

ViewPoint For Cloud (VFC) is a legacy version of the Cloud software

Note that these steps apply only to the first three options above.

Step 1: Make an introduction

Make an introduction between your IT contact and the ProNovos integration team by emailing them at implementation@pronovos.com.

Ensure you stay in the loop during this process to be aware of all communications between your IT and ProNovos integrations teams.

Step 2: Submit a Case

To begin, submit a Case with the following request:

Subject:

Setup ProNovos Integration with Spectrum Construction Management Software

Message:

We need to set up our data integration vendor ProNovos with access to our Spectrum Viewpoint data.

Please whitelist the following IP address: **52.1.167.38** on the TLS VPN.

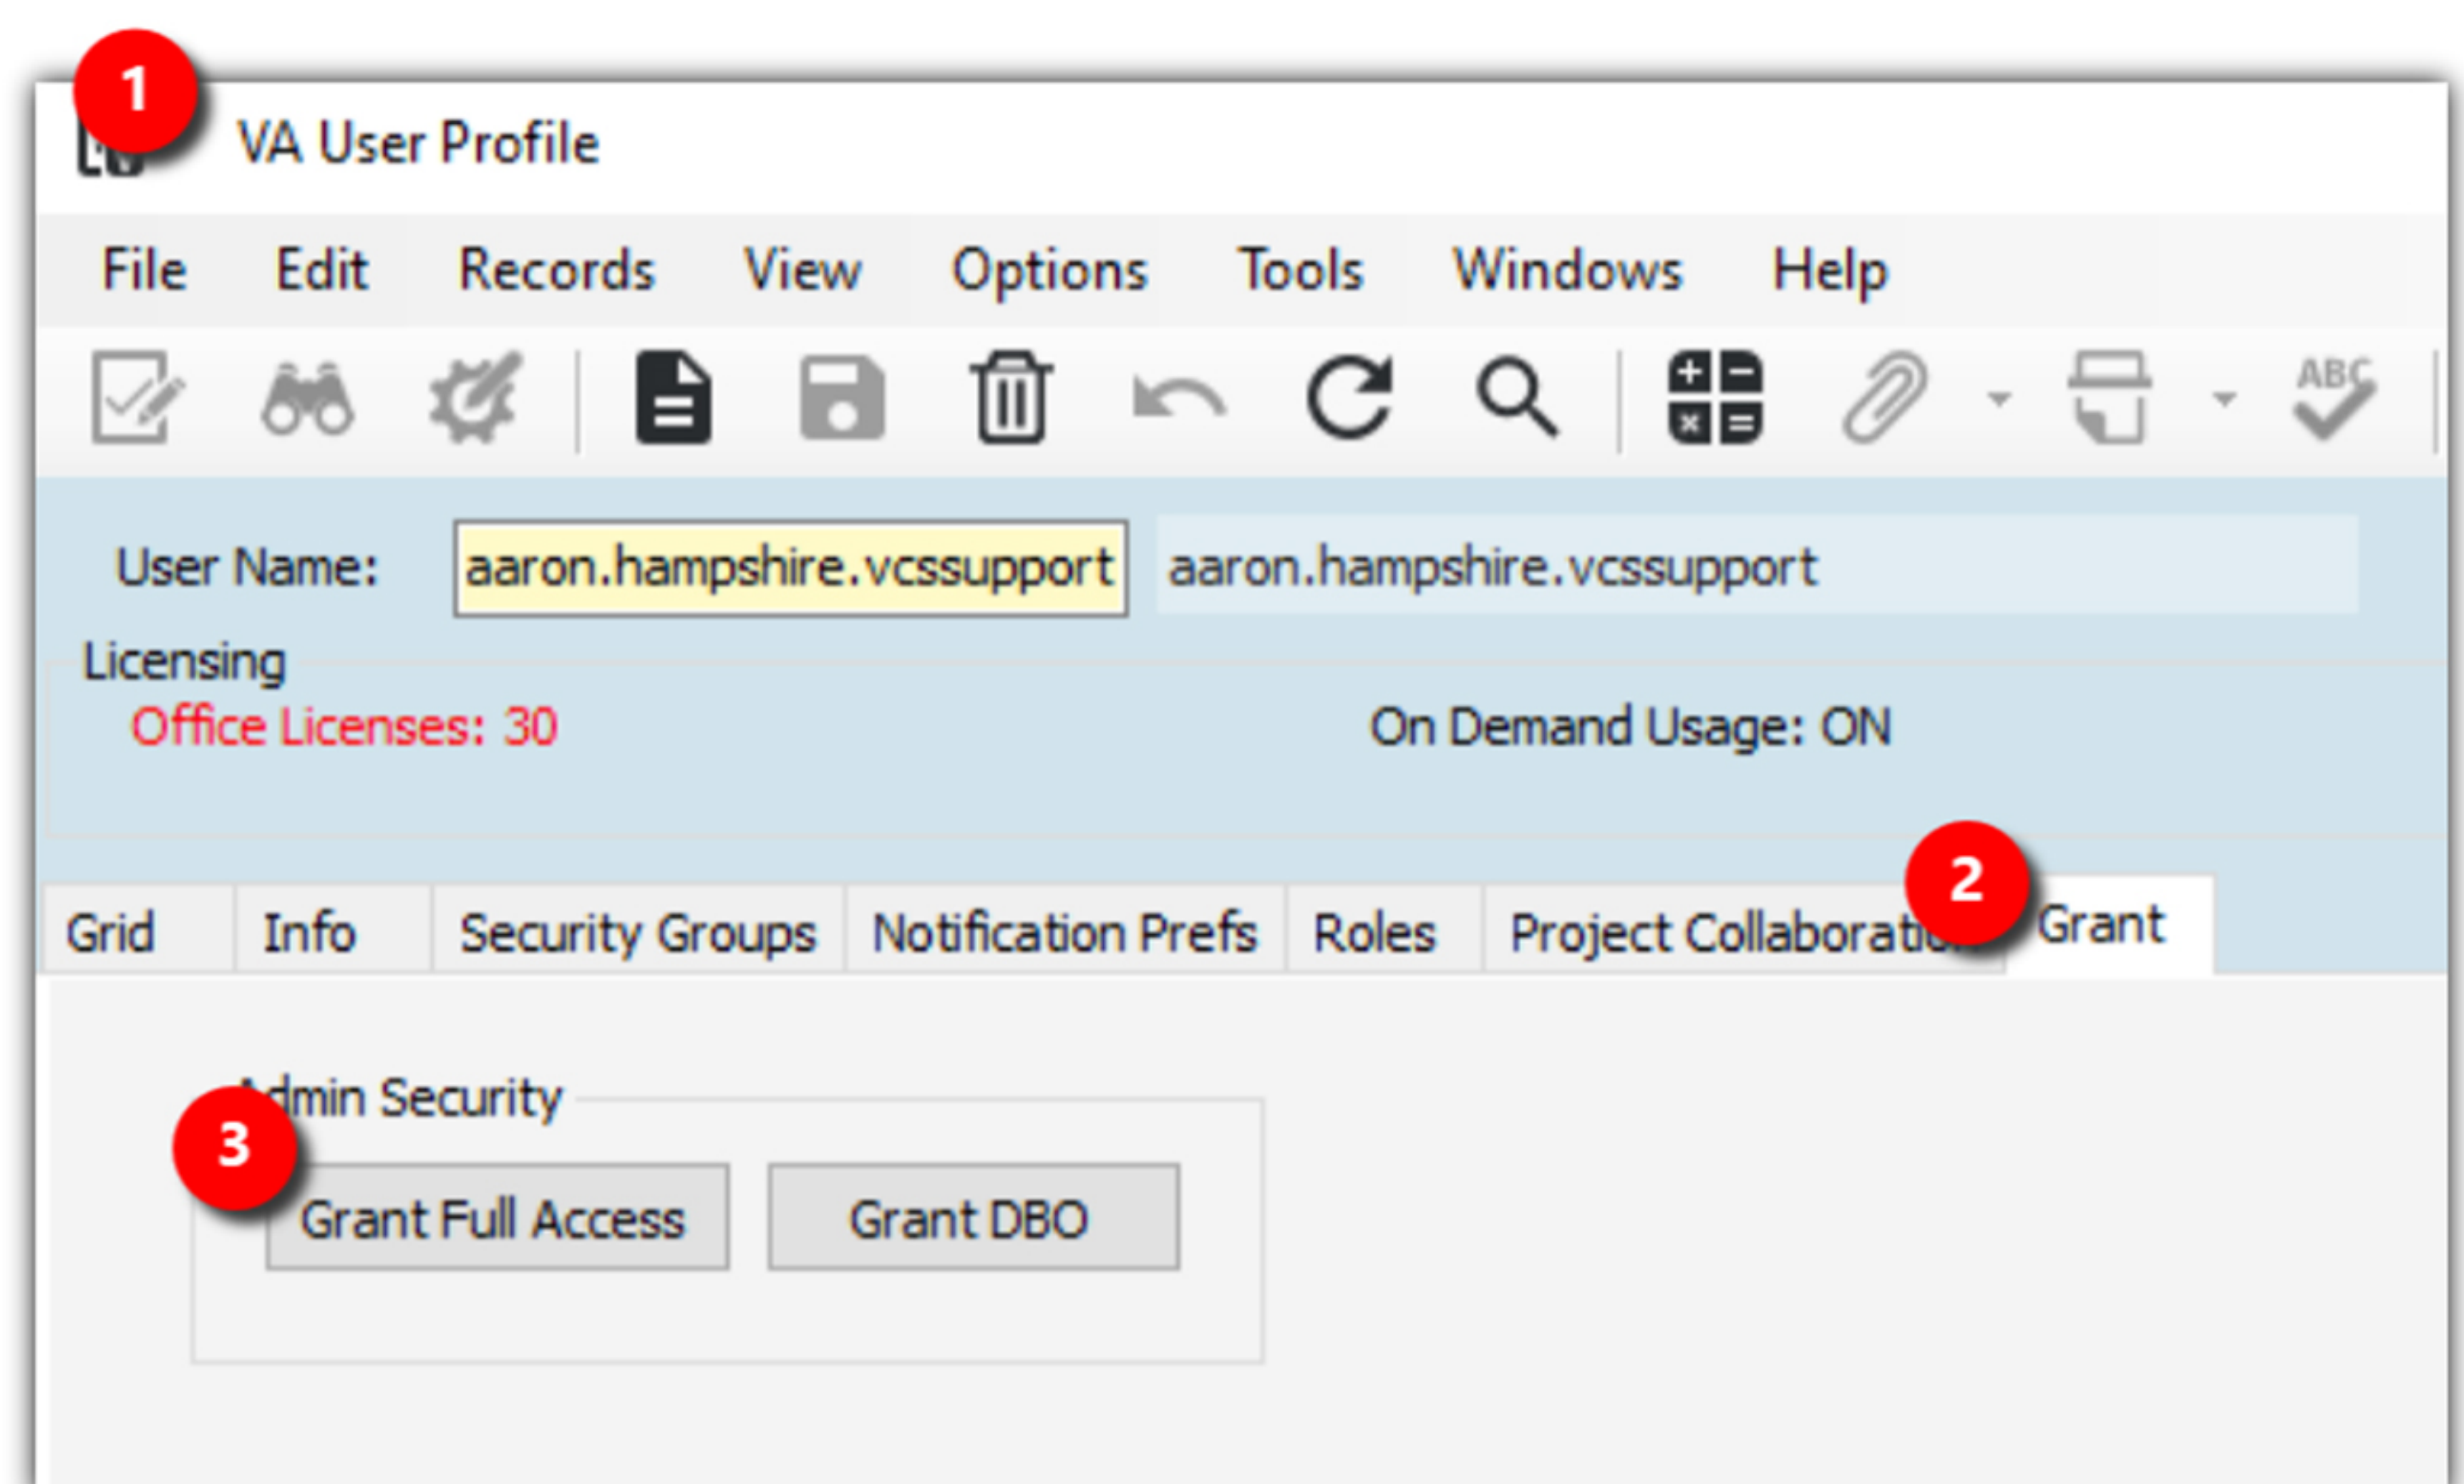

The Fully Qualified Domain Name (FQDN) is: *{please provide your FQDN in the format: xxxx-sql.viewpointdata.cloud,nnnn, where xxxx is your Company Code and nnnn is your Custom Port Number}*.

Please include support@pronovos.com for notifications regarding this case.

Step 3: Create a SQL User

Next, create a SQL User by following these steps:

1. Open the VA User Profile.
2. Click the Grant tab.
3. Select Grant Full Access to provide full View access for the new SQL User.

Step 4: Assign Database Role

Depending on your access level, you can either assign the database role yourself or submit a second Case with the following request:

Subject:

Assign db_datareader Role

Message:

Please assign the **db_datareader** role to the *{db username}* user inside the Viewpoint database.

The Fully Qualified Domain Name (FQDN) is: *{please provide your FQDN in the format: xxxx-sql.viewpointdata.cloud,nnnn, where xxxx is your Company Code and nnnn is your Custom Port Number}*.

Please include support@pronovos.com for notifications regarding this case.

If you have any questions or need further assistance, please contact our support team at support@pronovos.com.

Thank you for choosing ProNovos!
